This is only a sample of the Hebrew Flash Cards Template. It includes the letters "Alef," "Bet," Gimel," and the sounds "Ah" and "Oh."

The English corresponding sample is named: "Eng.Flash Sample.pdf."
You can view this file if you have the Adobe Acrobat plug-in.

To download the Complete template, click on the appropriate link for your platform (Windows or Mac). You need both the English and the Hebrew sets.
Once you've downloaded the templates, you can print the Flash Cards on your own printer. Set your printer for heavy paper so that you can print both sides on heavier stock. Print the Hebrew on one side, and the English - on the other. You can, of course, print the templates on regular paper as well. When you've done printing you need to cut the paper.

Make even cuts on the 8.5 x 11 size page.

Cut

You can take the template to a local print shop such as "Copy Max." They can do the printing and the cutting for you for a fraction of the price you would pay when you buy ready made flash cards.
