

Cutting Edge Hebrew-English Word Processors for Windows and MAC

MAC OS X

Mellel II

\$79.00

Mellel is an advanced word processor for Mac OS X, designed especially for scholars, creative and technical writers, or anyone seeking a feature-rich and reliable multi-lingual word processor.

The list of languages Mellel supports is long and impressive, but can be summed up in the following: Mellel fully supports all the scripts that are based on the Latin (Roman) alphabet, Chinese, Japanese and Korean (along with numerous variants and sub-scripts), Cyrillic and Greek alphabet, Arabic and Persian alphabet, Hebrew, Syriac and any other language written from right to left.

Add style to your Hebrew pages by using Hebrew World's "Most Beautiful Hebrew Letters." These great letters come in 9 styles that are integrated into this special edition of Mellel. You can use them for titles, logos, web pages, letterheads or newsletters. Since you insert each letter as a picture (.jpg) you can scale the size of the letters to fit your needs.

Windows OS
DavkaWriter 6

World's best Hebrew/English Word Processor!
Includes: The complete Tanach, Mishna & Siddur
Exports any document to Adobe® PDF format

The DavkaWriter Platinum 6 handles nikud and trope precisely. It supports both the phonetic and standard Hebrew keyboard layouts, and features an on-screen visual Hebrew keyboard, which makes text entry easy for those unfamiliar with the Hebrew keyboard layout. It includes a special 'low underline' feature which ensures that nikud is not obscured, has search and replace that matches nikud or trope, and the ability to select text of one language from a multi-lingual document, Jewish-themed page borders, and print preview that show the pages side by side, from right to left.

- ⊕ Auto Spell Check checks spelling as you type, in Hebrew and English!
- ⊕ Export files to Adobe® PDF format
- ⊕ Coloring of nikud and trope
- ⊕ Complete text of the Siddur with nikud
- ⊕ Bookmarks and Hyperlinks
- ⊕ Widow and orphan control
- ⊕ Hundreds of decorative and patterned page borders
- ⊕ Text boxes
- ⊕ Automatic bulleting, numbering and outlining
- ⊕ Yiddish support
- ⊕ Drag and drop editing, unlimited undo of previous actions
- ⊕ Easy-to-use, customized placement of nekudot and trop with Intelli-Accent
- ⊕ Many Hebrew and English fonts
- ⊕ Drop Caps
- ⊕ Inserts tables, columns, graphics, footnotes, headers and footers easily
- ⊕ Enables creation of templates
- ⊕ Many useful add-ons
- ⊕ Hebrew keyboard stickers
