

Targumatik Pro - Automatic full text translation!

Works great on your PC under all Windows OS!

A breakthrough program! With the 2009 Targumatik PRO™ your computer will translate any text automatically from English to Hebrew, and back again into English. Taking into account the rules of grammar, Targumatik produces a draft translation, which you can edit and polish. Although its best use is with a Hebrew supporting word processor, the program, using its own Hebrew font can also translate and paste Hebrew text into your non-Hebrew supporting word processor. A real time saver if you need to communicate back and forth in Hebrew and English.

Earlier today, the two miners smiled when they emerged from the cave and they hugged rescuers and family members.

On the other hand, they said "the incident was very scary, but all things considered, it is a necessary evil in our work".
